

# Magnetic Storyboard Instructions

We recommend an 8 ½" x 11" frame for the Farm Storyboard.  
We recommend an 11" x 14" frame for the Noah's Ark Storyboard.

To prepare the background to be magnetic, just go to your local sheet metal provider, and have a piece of sheet metal cut to fit the frame of your choice. Place the metal in the frame directly behind your background paper. Stamp, color, laminate, and cut out each image. Attach a small magnet to the back of each laminated image.
